

We are looking for IT support consultants with strong interest in eHealth

Are you interested in IT for the healthcare sector? Do you have experience with clinical applications? To meet the demand from our clients, we are looking for new experts to join our team to support, implement and integrate clinical applications.

Your working environment

You will be part of our dynamic support team that handles cases, error reports and projects included in the Service Desk concepts. We are supporting clinical applications, mostly for hospitals, where the majority of cases have a technical emphasis related to the application, database and operating systems. Our team also does implementation, upgrading and testing, which involve travel to our Nordic customers. The tasks are normally managed jointly within the team, but the work involves considerable independent work.

In addition to support we have development projects and consultancy assignments. You might also be involved in some sales support and technical offer preparations.

The customers are mainly in the Nordics but also elsewhere in Europe.

Appreciated skills

- Technical degree
- Knowledge of clinical applications, in addition to the technical aspect, is an advantage.
- Experience from development and support of Clinical IT systems & interfaces and solution architecture
- Fluent in Swedish language and English in speaking & writing
- Willingness to travelling within in the Nordic countries and Europe
- Situated in/near Stockholm or Jönköping
- Our company's success depends on every employee's interest, inspiration and participation. Therefore we consider these characteristics as very important.

Our offer

- Taking part in interesting and rewarding projects within the Healthcare IT industry.
- Joining a great, international team with extensive experience in the eHealth market
- Possibility to grow with the company
